WHY A SUMMER INTERNSHIP WITH QUANTIUM?

As a summer intern at Quantum, you’ll be mentored on the job at the forefront of data analytics. Your work will be project focused and will help you develop a diverse range of commercial and technical skills to begin your professional journey towards becoming a trusted client advisor. Don’t take our word for it though, below are some thoughts from one of our past summer interns:

Quantum provided me with an unparalleled opportunity to explore the exciting world of big data. As Australia’s leading company in data analytics and consulting, I was given exposure to a wide array of data assets and analytical tools that no other company could offer. One of the greatest aspects of the internship was the meaningful projects I was given. These projects helped me develop new skills and also gave me drive and direction knowing that they would be used in production. Add to that the young, vibrant and welcoming culture and you have what I believe to be one of the best career opportunities in the market.  

HOWTOAPPLY

Applications for the 2016 Graduate Program are open from now until 28 August 2015

To apply, please submit your academic transcripts, cover letter and resume to:
recruitment@quantium.com.au

MORE ABOUT YOU

We’re intrigued by data and its possibilities so we hope you will be too! You are intellectually curious and well-rounded, keen to continuously learn new things, innovate and solve problems. You’ll be working with many talented and bright people very willing to share their knowledge, so what you can learn will only be limited by your desire to do so. We would love for you to have an Actuarial, Mathematics, Engineering or Business / Commerce background, and this background, coupled with your strong academic results, will provide the foundation for your success.

MORE ABOUT QUANTIUM

Founded 13 years ago when big data was not yet on the radar of the business world, Quantum is a globally recognised leader in the development of data-driven insights and ideas. Insights into the rapidly changing needs and preferences of consumers, and ideas about how brands can engage customers and what they must do to succeed.

Our deep analytical expertise coupled with our data partnerships with NAB, Woolworths, Foxtel, CoreLogic, Facebook and News Corp gives us a compelling and disruptive offering, which is highly unique in Australia. We bring the highest pedigree to our combined skill sets of data, analytics, technology and media, enabling the brands we work with to create new and sustainable sources of competitive advantage.

ONE OF A KIND

We offer a unique opportunity to kick start your career in the world of big data and analytics. At Quantum you will:

- Work closely with some of the best minds in the industry
- Be part of a fast growing business, ensuring you are always kept on your toes!
- Have exposure to the latest technology in relation to big data and analytics - we constantly push the boundaries by delivering cutting edge projects
